CAREER OBJECTIVE

Motivated data analyst with experience in data mining, statistical analysis, and data visualization seeking to utilize my skills to uncover insights and improve business processes. Proficient in SQL, Python, Excel, and AWS. I am dedicated to delivering accurate and actionable insights to support data-driven decision-making.

SKILLS

SQL, PYTHON, R, ADVANCED EXCEL, SAP BW4/HANA, POWER BI, DATABASES DESIGN, C, PHP (LARAVEL), JAVASCRIPT, NODE JS, GIT, SOCIAL ETHICS IN DATA ANALYSIS, SHAREPOINT, VISUALIZATION, TABLEAU

EDUCATION

- MS IN DATA ANALYTICS (AUGUST 2022)
  Webster University
- BTECH IN INFORMATION AND TECHNOLOGY (AUGUST 2016 – JULY 2020)
  Sharda University

WORK EXPERIENCE

1. STUDENT BUILDING MANAGER (Webster University, May 2023-)

- Monitor buildings and take appropriate action to maintain a proper environment and security.
- Respond to unusual occurrences such as vandalism, theft, fire, and injury. Report problems to the appropriate university staff.
- Make observations and suggestions to UC full-time staff aimed at improving operations and programs.

2. SOFTWARE DEVELOPER (Spell Innovation Pvt. Ltd., Sept 2020-July 2022)

- Collaborated with project manager to select ambitious, but realistic coding milestones on pre-release software project developments.
- Updated old code bases to modern development standards, improving functionality.
- Developed desktop and mobile operating system software and designed databases for different applications.
- Working together to create leading software products using cross-functional teams that include product managers, designers, and QA engineers.
- Introduced agile methodologies and development best practices to the division to enhance product development.
- Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments, clear code, and deployment processes using tools such as Git.

3. <u>BACK-END DEVELOPER (Digital Optimized and Tenacious Solutions (DOTS), April 2019-July 2020)</u>

- Created RESTful APIs that enable communication between the front-end and back-end of an application.
- Implementing database designs and optimizing database queries for performance.
- Developing and maintaining server-side applications using programming languages such as Python and Node.js.
- Identifying and resolving technical issues, bugs, and performance bottlenecks
- Participating in code reviews and providing constructive feedback to peers.

PROJECTS

1. **Customer Segmentation (SKILLS: python, SQL, AND DATA Analysis)** - Conducted data analysis on customer and product sales to automate business sales, which resulted in a 7% increase in company sales during the first quarter of 2022.
2. **Customer Feedback and Analysis System (Skills: Python Django, Sqlite, AND TABLEAU)** - Designed and developed an application to gather precise data to feed into an analytical dashboard. The dashboard can break down the data into different categories such as complaints and satisfaction, which can then be reviewed to improve customer satisfaction. By using customer feedback, the dashboard provides insights on service improvements over time. The end result is a user-friendly application that helps to boost customer satisfaction.
3. **SPELL School Management system (SKILLS: Laravel, SQL, JAVASCRIPT, REACT)** - Developed a fully customized Learning Management System (LMS) that included applications for managing students, teachers, transportation, scheduling classes, exams and results, reporting, and invoicing and fee administration. This was one of Spell's largest projects, requiring ongoing attention and bug-fixing. I was responsible for maintaining the system with minimal downtime while monitoring and optimizing its performance.
4. **V-Attendace Application (SKILLS: Node JS, SQL, REACT JS, REST API, GIT)** - Developed and customized several modules for an attendance application, including Subjects, Attendance, Student, Teacher, and Admin. The system allows administrators to easily access and filter students' and teachers' records, while teachers can use their accounts to monitor attendance for specific subjects. To improve user experience, I designed a simple dashboard with a few color options. The end result is an efficient and easy-to-use attendance system.
5. **OPEBO E-commerce Website (MERN Tech Stack, April 2019 - June 2020)** - Fully Customizable e-commerce website
    - Designed and developed RESTful APIs to facilitate communication between the front-end and back-end systems.
    - Designed and implemented database schemas and models that optimized data storage and retrieval.
    - Implemented server-side frameworks such as Node.js, Express to accelerate development and improve code maintainability.
    - Implemented automated testing and monitoring of third-party integrations to ensure ongoing reliability and functionality.
    - Improved overall code quality by reducing the number of code defects and increasing test coverage.
    - Integrate with a payment gateway - Razorpay.

ACHIEVEMENTS

- Graduated with honors and a gold medal, and was also on the Dean's List. (July 2020)
  Highest scorer in the Computer Science department.
- National Champion under 45kg category in Taekwondo, (December 2016)
